

a vending machine will be installed at Polaris K-12

School.

1. students are always in need of food and nutrition and often they do not get enough;
2. , vending machines provide quick and convenient access to food and nutrition;
3. , with a vending machine students would be able to get something to eat even when the cafeteria is closed;
4. , a vending machine would give students an option for a snack instead of asking for snacks from a friend;
5. , according to Food Navigator USA: "Only 36 percent of high school students eat breakfast every day, as do 50 percent of middle school students and 77 percent of young children." ;
6. , a vending machine would help kids have something to eat in the morning;
7. , all other secondary schools in the ASD have at least one vending machine;
8. , a vending machine would pay for itself if used; and

proposal : of vending machine will be installed at Polaris K-12 School
